FCC - MAILROOM

November 1, 2005 5:07 PM

Senator Dick Durbin
U.S. Senate
332 Dirksen Senate Office Building
Washington, DC 20510-0001

Subject: Re: Federal-State Joint Board on Universal Service CC Docket 96-45

Dear Senator Durbin:

I have serious concerns regarding FCC Chair Kevin Martin, Congress's (FCC) position to change the Universal Service Fund (USF) collection method to a monthly flat fee. Many of your constituents, including me, my friends, family and neighbors, will be negatively impacted by the unfair change proposed by the FCC.

As you know, USF is currently collected on a revenue basis. People who use more pay more into the system. If the FCC changes that system to a flat fee, that means that someone who uses one thousand minutes a month of long distance, pays the same amount into the fund as someone who uses zero minutes of long distance a month. Constituents who use their limited resources wisely should not be penalized for doing so.

A flat fee tax could cause many low-volume long distance users, like students, prepaid wireless users, senior citizens and low-income residential and rural consumers, to give up their phones due to unaffordable monthly increases on their bills. Shifting the funding burden of the USF from high volume to low-volume users is radical and unnecessary. In addition, it would have a highly detrimental effect on small businesses all across America.

The Keep USF Fair Coalition, of which I am a member, keeps me informed about the USF issue with monthly newsletters and up-to-date information on their website, including links to FCC information. While I am aware that federal law does not require companies to recover, or "pass along" these fees to their customers, the reality is that they do. As a consumer I would like ensure I am charged fairly. If the FCC goes to a numbers taxed, my service will cost more. And according to the Coalition's recent meetings with top FCC officials, the FCC has plans to change to a flat fee system soon and without legislation.

I will continue to monitor developments on the issue and continue to spread the word to my community. I request you pass along my concerns to the FCC on my behalf, letting them know how a flat fee tax could disproportionately affect those in your constituency.

Thank you for your continued work and I look forward to hearing about your position on this matter.

Sincerely,

Nadia Kanhai

FCC - MAIL ROOM

November 7, 2005 12:42 AM

Senator Wayne Allard
U.S. Senate
521 Dirksen Senate Office Building
Washington, DC 20510-0001

Subject: Re: Federal-State Joint Board on Universal Service CC Docket 96-45

Dear Senator Allard:

I have serious concerns regarding the Federal Communications Commissions' (FCC) position to change the Universal Service Fund (USF) collection method to a monthly flat fee. Many of your constituents, including me, my friends, family and neighbors, will be negatively impacted by the unfair change proposed by the FCC.

The amount of fees collected on communications equipment is already a burden on a great many individuals. It is reaching the point where those who need the services most are least able to afford a higher monthly bill.

As you know, USF is currently collected on a revenue basis. People who use more pay more into the system. If the FCC changes that system to a flat fee, that means that someone who uses one thousand minutes a month of long distance, pays the same amount into the fund as someone who uses zero minutes of long distance a month. Constituents who use their limited resources wisely should not be penalized for doing so.

In addition, it would have a highly detrimental effect on small businesses all across America.

Washington, DC 20515-0001

Subject: Re: Federal-State Joint Board on Universal Service CC Docket 96-45

Dear Representative Pelosi:

I am incensed regarding the Federal Communications Commissions' (FCC) position to change the Universal Service Fund (USF) collection method to a monthly flat fee. Many of your constituents, including me, my friends, family and neighbors, will be negatively impacted by the unfair change proposed by the FCC.

This will increase my cost of phone service despite my lack of use. THAT's robbery. I QUIT using Long Distance because I couldn't afford it. Now Martin (the new commissioner) wants to take money for something I don't use. You KNOW that's not proper and will financially hurt me. I am on Social Security, which is a limited income whose increases depend on your largesse, and at 78 I cannot get a job to cover the cost he wishes to add to my phone service.

As you know, USF is currently collected on a revenue basis. People who use more pay more into the system. If the FCC changes that system to a flat fee, that means that someone who uses one thousand minutes a month of long distance, pays the same amount into the fund as someone who uses zero minutes of long distance a month. Why do you all insist on taxing those who can least afford to pay taxes in addition to Federal and State taxes. You want to raise money. Do it honestly. Remove the tax cuts for the wealthy individuals and corporations. They already make money off those less fortunate through the sale of goods and services. Retain the estate tax. Get the out of government. Get us out of the hopeless war in Iraq. Until the tribes make peace, there can be no democracy. With the remediation decisions, we can seriously reduce the national debt.

Thank you for your continued work and I look forward to hearing about your position on this matter of the Universal tax.

Sincerely,

Rachel Warren

Dear Representative Wynn:

I have serious concerns regarding FCC Chair Kevin Martin, Congress's position to change the Universal Service Fund collection method to a monthly flat fee. Many of your constituents, including me, my friends, family and neighbors, will be negatively impacted by the unfair change proposed by the FCC.

As you know, USF is currently collected on a revenue basis. People who use more pay more into the system. If the FCC changes that system to a flat fee, that means that someone who uses one thousand minutes a month of long distance, pays the same amount into the fund as someone who uses zero minutes of long distance a month. Constituents who use their limited resources wisely should not be penalized for doing so.

I am 12 and I am worried about this. I know I am more intelligent than others, but this is seriously an important issue. There are many poor people without telephone service now, limiting their ability for communication to mail, which takes at least one week, first class, to arrive. What if there's an emergency? a fire? a robbery? How will they notify the fire department in time or police department? You are creating a serious safety issue, which is unacceptable. Basically what you are doing is implementing a radical and unnecessary system. Many people such as prepaid wireless users, senior citizens, and rural areas do not call long distance.

While I am aware that federal law does not require companies to recover, or "pass along" these fees to their customers, the reality is that they do. And according to the Coalition's recent meetings with top FCC officials, the FCC has plans to change to a flat fee system soon and without legislation.

Thank you for your continued work and I look forward to hearing about your position on this matter. Please take this and all messages on this topic into serious thought.

Dear Senator Schumer:

I have serious concerns regarding FCC Chair Kevin Martin, Congress's (FCC) position to change the Universal Service Fund (USF) collection method to a monthly flat fee. Many of your constituents, including me, my friends, family and neighbors, will be negatively impacted by the unfair change proposed by the FCC. That's just unfair.

As you know, USF is currently collected on a revenue basis. People who use more pay more into the system. If the FCC changes that system to a flat fee, that means that someone who uses one thousand minutes a month of long distance, pays the same amount into the fund as someone who uses zero minutes of long distance a month. Constituents who use their limited resources wisely should not be penalized for doing so. The fee should be based on usage.

A flat fee tax could cause many low-volume long distance users, like students, prepaid wireless users, senior citizens and low-income residential and rural consumers, to give up their phones due to unaffordable monthly increases on their bills. Shifting the funding burden of the USF from high volume to low-volume users is radical and unnecessary. In addition, it would have a highly detrimental effect on small businesses all across America.

The Keep USF Fair Coalition, of which I am a member, keeps me informed about the USF issue with monthly newsletters and up to date information on their website, including links to FCC information. While I am aware that federal law does not require companies to recover, or "pass along" these fees to their customers, the reality is that they do. As a consumer I would like ensure I am charged fairly. If the FCC goes to a numbers taxed, my service will cost more. And according to the Coalition's recent meetings with top FCC officials, the FCC has plans to change to a flat fee system soon and without legislation.

I will continue to monitor developments on the issue and continue to spread the word to my community. I request you pass along my concerns to the FCC on my behalf, letting them know how a flat fee tax could disproportionately affect those in your constituency.

Thank you for your continued work and I look forward to hearing about your position on this matter.

Sincerely,

Dennis Dengel

Dear Senator Durbin:

I have serious concerns regarding FCC Chair Kevin Martin, Congress's (FCC) position to change the Universal Service Fund (USF) collection method to a monthly flat fee. Many of your constituents, including me, my friends, family and neighbors, will be negatively impacted by the unfair change proposed by the FCC.

As you know, USF is currently collected on a revenue basis. People who use more pay more into the system. If the FCC changes that system to a flat fee, that means that someone who uses one thousand minutes a month of long distance, pays the same amount into the fund as someone who uses zero minutes of long distance a month. Constituents who use their limited resources wisely should not be penalized for doing so.
